Introduction

Purpose

The purpose of this document is to describe the requirement specification for the web site “SkiSwap”.

The intended audience for this document is Bob Erickson and TAs.

First it is the contract between you and the client. Second it is for the developer of the site. Two primary goals are:

1. *Client gets a very good understanding of what you will be delivering.*
2. *Developer has a very good understanding of what they are going to create.*

Definitions, acronyms, and abbreviations

Sample for the client:

HTML – Hypertext markup language – used to define your content.

PHP – Personal Home Page – language that helps to customize html.

CSS – Cascading Style Sheets – used to define the look of a web site.

W3 Validation – refers to both Html and CSS validation tool provided by the W3c.org. the html validator is located at:

<http://validator.w3.org/>

with the CSS validator located at:

<http://jigsaw.w3.org/css-validator/>

Overall Description

Ski Swap is a website devoted to trading ski equipment. Our aim is to provide a platform for those who love the sport, but can’t afford all the expensive gear – so we devised Ski Swap!

By creating an account with Ski Swap, one can donate old ski equipment (by filling out our “Sell” form). We will then update our records once the request has been verified. Alternatively one can select an order from our supplies.
